International
Forum**

27-28 September 2017
Palazzo Isimbardi
Milan

Under the auspices of the Italian G7 Presidency

MILANO
GLOBAL

rulesofwater.milanoglobal.org

The First International Forum RULES OF WATER, RULES FOR LIFE (ROW), organized under the auspices of the Italian G7 Presidency 2017, is an annual event on water as a multi-faceted phenomenon and key element of sustainable development.

RULES OF WATER, RULES FOR LIFE programme focuses on two main crucial aspects related to water: urban water governance and gender-related aspects of water.

The conference, promoted by Milan Center for Food Law and Policy, benefited from the scientific support of OECD Water Governance Programme and UNESCO World Water Assessment Programme.

The Forum aims at providing a platform to encourage multisectoral and multidimensional debate and exchanges of experience among representatives of academic community, lawmakers, regulators, private sector experts, international organizations, and governmental bodies. It will attempt to foster the discussion on the translation of existing water-related principles into practice taking into account the context of 2030 Agenda with the special attention to the Goal No.6 in water, Goal No.11 dedicated on the resilient cities, and to the Goal No.5 on gender equality and women empowerment.

In addition, the year 2017 marks the 25th anniversary of The Dublin Principles as the milestones of water law. Accordingly, the Forum will be an excellent occasion to review their implementation, the level of their integration into the 2030 Agenda, as well as to share lessons learned and to disseminate actionable policy recommendations for both international and local stakeholders together with Forum's scientific partners.

The event is part of the project Milano Global©.

27 DAY one September

Organized in cooperation with
OECD Water Governance Programme

BETTER POLICIES FOR BETTER LIVES

08:45-09:30 ACCREDITATION OF PARTICIPANTS

Cloister

Welcoming the guests: maestro **Michele Ranauro** plays the piano

CLOSING REMARKS - WATER-HACK

The first Water School Hackathon

promoted by the Italian Ministry of Education, University and Research (MIUR)

Winning students of the contest will present the achieved outcomes. Their speech will be introduced by:

Simona Montesarchio, Director General for School Buildings and Innovation - MIUR

Massimo Labra, Associate professor at the Department of biotechnologies and biosciences of Bicocca University

Lorenzo Micheli, Coordinator for the Water School Hackathon - MIUR

Along with two-day conference Rules of Water, Rules for Life, the first national water Hackathon is promoted by the Italian Ministry of Education, University and Research. Under scientific contest supported by Bicocca University, at the headquarter of the Institute of Blind People of Milan, located few meters from Palazzo Isimbardi - 100 students from all over Italy will analyze three major themes: **Water and the city; Women and water; International cooperation for water.**

Winners of the contest will present the achieved outcomes and will find room within the Forum concluding the event in the adequate way ensuring the true commitment for the future.
